

Earth's Present-Day Global Warming Enigma

Exclusively Written For The
"X" Chronicles Newspaper

By:

Jaysen Q. Rand, Ph.D.

It's late Fall 2007 in the 21st century. We're now witnessing the dramatic effects of an increasing global warming/earthquakes/intense tropical storms/extended forest and wild fire seasons/much warmer winters and summers, plus drastic changes in all of our planet's regular weather systems. Are we now experiencing what could be the forthcoming countdown to a possible pole shift event in 2012? And further, have we become so complacent about Earth's plight that we've lost sight of the bigger picture—a colossal landscape far more complicated than we first imagined?

What just happened with the catastrophic wild fires still burning in Southern California answers that question and that scenario demands serious deliberation! Is 'global warming' a factor here?

Earth's calendar date in November presently finds our fragile blue world in dire crisis. Consider the facts of overpopulation / global warming / badly depleted ozone layer/rain forest devastation / with uncontrollable wildfires / hurricanes / typhoons /tornadoes / global flooding / storms / tsunamis / droughts / Arctic-Antarctic meltdowns/mass extinctions of multiple plant and wildlife species / widespread famines / deadly disease outbreaks of many animal and human strains / ever-increasing worldwide earthquake and volcanic activity—all of which are collectively taking a heavy toll on human, plant and animal life—not to mention billions upon billions of dollars in global property damage, lost wages, a nervous economy, major consumer disruptions to the everyday needs of its citizens. Mother Nature takes no prisoners—gives no quarter—and remains uncontrollable.

And so our planetary saga of mysterious/weird events continues on with both the weather and geophysical disasters becoming more frequent/much worse every year. All the while the U.S. government (and those of most other developed nations around the globe) are

desperately trying to implement their ever-increasing preparation efforts currently costing hundreds of billions of unanticipated cleanup dollars / loss of lives and property damage / escalating insurance costs.

The primary thrust of our best-selling 342-page book, *The Return Of Planet-X*, centers around the researched premise that we believe our planet (and the other eight in our solar system) have now been experiencing a strange array of abnormal changes detected in their established celestial characteristics. The culprit, we believe, may be the recurring drama of planet Earth (and the rest of the solar system) being revisited approximately every 3,600-4,000 years by a large rogue planetary-type body, possibly a failed Brown Dwarf star that we believe is called "Wormwood."

Every year since 1992 when hurricane Andrew, (a devastating CAT/5) nearly destroyed south Florida, the nation's natural disaster price tag continues rising dramatically by billions of dollars every year! (Note: Katrina and Rita's ravaging storm damage is currently estimated around \$85 billion with real-time final costs still undetermined.) Beautiful New Orleans is still not the same.

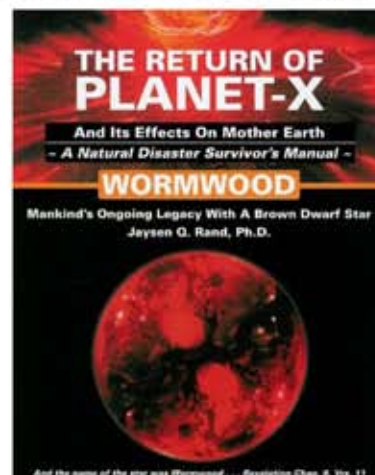

Questions: Is the cosmic handwriting already on the wall? Does the government know more about Planet-X than they're telling us and are the answers to our current natural disasters dilemma more obvious than we know or understand? The answers we discovered (to those and many other key questions examined in this exciting/informative book) produced our direction/ guidance to research/study and then write this work. There were hundreds of arcane answers revealed in this writing process that may surprise you-or-not! So... let's step off into space-deep space!! Discovering the secret of Revelation's "Wormwood" may solve this great puzzle. (Continued on Page 32)

**SO WHAT DO
UFOS/ETS AND
PLANET-X COMING
IN 2009 AND 2012 ALL
HAVE IN COMMON?**

The answer is easy—Ancient Mayan prophecies simply call it: "THE END OF TIME." Author Jaysen Q. Rand's new best-selling book "The Return Of Planet-X" tells all about it. Jaysen Q. Rand, Ph.D., is available for radio and TV interviews by contacting him at skipper.2012@hotmail.com or by calling (662)-280-2181. Check out our website: www.returnofplanet-x.com for full details about Rand's provocative, controversial, eye-opening book and its critical message about planet Earth's future and how we should prepare for "X's" anticipated arrival and "The End Of Time."

Earth's Present-Day Global Warming Enigma

Continued From Page 32

And it's against this backdrop of a very complicated mix of planetary creation and its subsequent destruction scenario that our Planet-X Survivor's Manual focuses its primary creative attention to The Return of Planet-X and its ugly aftermath. Our research addressed these important issues to inform you, our readers, of this 'bigger picture'-those recurring periodic cosmic events that reshape all life across this vibrant yet delicate planet-both in the distant past and near future.

Even though there's been many differing catastrophes striking Earth over time, we focus on one specific 'recurring cataclysm' largely responsible for major geologic changes to our world.

This recurring calamity is relatively simple to understand, at least in concept. Our hypothesis involves a large 'celestial object' (possibly a brown dwarf star), periodically close-passing our world in space and, as it does so, this object's massive electromagnetic gravitational force field causes enormous physical changes to Earth's topography-occasionally even altering its axis of rotation with end results triggering a potentially catastrophic trans-global 180 degree pole shift.

This incoming object does not hit the Earth-our planet is not totally destroyed by its passage; instead it drastically 'alters'/affects how our planet mechanically rotates in space on its polar axis! And aside from just affecting Earth's rotation, this passing celestial object also triggers a series of massive planetary disasters involving catastrophic flooding/monstrous tornadoes/global tidal waves (tsunamis)-with dozens of 9.0+ earthquakes/active volcanoes/howling winds/and planetary wildfires threatening the world. -Do any of the above facts sound vaguely familiar?

It's because of these enormous geologic changes taking place [when this 'celestial object' passes us in space]-that makes reading our work critically important for every American and citizen of planet Earth living today. Should this cosmic "X" 'fly-by'event happen again-it will radically/ forever change 'life' as we 'know it' for everyone presently living on this world at this time.

The most current hypothesis we have to examine concerning X's next return through the solar system centers around the fact that X's extended orbit (about every 3,600 years-first passing through the solar system then back out again), suggests that its 'destructive cycle' may occur in two phases. The 'first phase' begins with X's 'initial pass-through' in 2009 separated by three years to its 'second phase' wherein it makes its 'second pass-through' the solar system in 2012.

This 2012 passage marks X's return leg back into deep space beginning again its 3,600-4,000-year trek through the heavens. As mentioned earlier in this report-we believe X's last return visit to the solar system most likely coincided with the Hebrew's exodus from Egypt, (around 1447 BCE-roughly 3,460 years

ago.) A metaphysical question: Did God somehow come to Moses' aide by staging a cosmic event that Moses himself and no one today truly understands?

Recent research in our book now suggests that fall 2009 might be the initial date for X's next 'first phase' return surprise. Calculating approximately three years for its 'second phase' pass-through, we estimate a future winter date in 2012. And therein, dear reader, lays the greatest 'astrological' paradox of modern times-for it now appears that even the cosmos itself is playing a dramatic role... Astrology and all things 'astrologically' considered-represents the study that assumes and attempts to interpret the influence that celestial heavenly bodies sway over human affairs-notwithstanding Planet-X and the dark scientific information vacuum surrounding it!

For some unknown and truly mysterious reason, the Mayan's Sacred Celestial Calendar Codex inexplicably ends 21 December 2012. According to ancient Mayan cosmology, 'time' as we know it on Earth will reach its climax on that particular date in 'real-time.' And there are other sources clearly identifying 2012 as the prophesied 'end-of-time' sequencing point here on planet Earth. Hopi nation elders proclaim 'this event' will initiate their 'Great Day of Purification.'

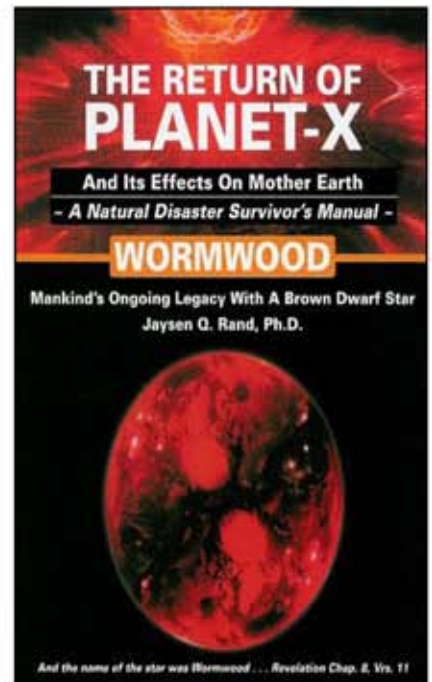

Are these end-times reports and dates simply a 'strange coincidence,' -just a 'silly legend of time' -or are they possibly 'major clues' leading us to wisely unravel/rediscover this cosmic mystery of time, space and Earth's destiny announcing Planet-X's next return in 2009/2012?

Wise words state: Knowledge equals power -but real power is in the knowing-believe it!!

We also hypothecate that our present-day 'global warming enigma' may be inexorably linked to Planet-X. The following dissertation examines these issues from the inside out-taken from the Exhibits Section of our book-The

Return Of Planet-X -we'll review highlights of this topic in a fair/balanced presentation. We suggest visiting our new website at www.returnofplanet-x.com for interesting and challenging details about this linkage to Planet-X and how to obtain a copy of our hit book in either paperback and e-book version. Our second printing is now in bookstores.
